WORKING EXPERIENCE

DevSecOps Engineer *May 2024 – Present*

European Dynamics *Remote*

Technologies: Kubernetes, Helm Charts, Docker, ArgoCD, AWS, Prometheus, Grafana, Loki, Netdata, AWS CDK, Jenkins, GitLab CI, SonarQube, Dependency Track, OWASP Zap.

Responsibilities:

- Developed and maintained secure CI/CD pipelines for continuous integration and delivery. Integrated security testing tools into the CI/CD pipelines for vulnerability scanning and code analysis.
- Managed and orchestrated containerized applications on Kubernetes clusters. Developed and maintained Helm charts for automated Kubernetes resource deployments.
- Automated and managed GitOps workflows for continuous deployment using ArgoCD.
- Designed and implemented secure infrastructure on AWS using Infrastructure as Code (IaC) with AWS CDK.
- Set up and managed monitoring systems for real-time visibility into infrastructure and performance, enabling proactive detection and resolution of issues.

Full Stack Engineer *Aug 2023 – April 2024*

FlexCar *Remote*

Technologies: Next.js, Node.js, TypeScript, MongoDB, AWS, GitHub Actions.

Responsibilities:

- Developed REST APIs and integrated application with Google Maps API.
- Contributed to the implementation of real-time data features.
- Designed and developed efficient UIs to enhance user experiences.
- Designed and optimized ETL processes for seamless data extraction and transformation.
- Optimized application performance by refactoring inefficient code.
- Employed GitHub Actions to create infrastructure in AWS, automate integrations and deployments.

Assistant Lecturer on Lab ***Oct 2023 – March 2024***

School of Electrical & Computer Engineering, *Chania, GR*
Technical University of Crete

Responsibilities:

- Developed and delivered engaging laboratory sessions focusing on HTML, CSS, JavaScript, Docker, Keycloak, Apache Kafka, Google Cloud Platform, and microservices.
- Assisted students in the integration and configuration of Keycloak, Apache Kafka, and Google Cloud Platform services into laboratory project, providing valuable insights into cloud computing and modern application development. Designed and developed efficient UIs to enhance user experiences.
- Provided hands-on guidance and support to students during the laboratory project, fostering a dynamic and interactive learning environment. Optimized application performance by refactoring inefficient code.

Web Developer ***Oct 2022 – Febr 2024***

KEDIMA (TUC) *Chania, GR*

Technologies: HTML5, CSS, Vanilla JavaScript, React.JS, Typo3, Nginx.

Responsibilities:

- Designed, developed, and maintain user-friendly website for Technical University of Crete.
- User can search files by keywords or the category menu.

Website: https://www.tls.tuc.gr

Web Developer ***May 2020 – May 2022***

Hagiographies Dimas *Grevena, GR*

Technologies: HTML5, CSS, Bootstrap, JavaScript, PHP & MySQL.

Responsibilities:

- Developed and maintained company's portfolio.
- User can insert, update & delete photos from MySQL database.
- Supports sign-in, cryptography, password validation.

EDUCATION

Master of Science in Computer Science and Engineering ***Nov 2022 – Present***

Technical University of Crete *Chania, GR*

Integrated Master of Science in Electrical and Computer Engineering ***Sept 2014 – Aug 2021***

Chania, GR

Integrated Master of Science in Electrical and Computer Engineering

- **Dissertation:** Publication and Subscription Services in Web Applications: A Comparative Study.

PUBLICATIONS

Journal Publications

1. Apostolos Lazidis, Konstantinos Tsakos, Euripides G.M. Petrakis, "*Publish - Subscribe Approaches for the IoT and the Cloud: Functional and Performance Evaluation of Open-Source Systems*", Internet of Things, May 17, 2022.
2. Apostolos Lazidis, Euripides G.M. Petrakis, Spyridon Chouliaras and Stelios Sotiriadis, "*Open-Source Publish - Subscribe Systems: A Comparative Study*", 36th International Conference on Advanced Information Networking and Applications (AINA 2022), Virtually, Sydney, Australia, April 13 - 15, 2022.

PROJECTS

- Developed a blog application with microservices, create docker images with Jenkins and after deploy application in GKE with Terraform.
- In an infrastructure of GKE multiclusters installed by terraform and shell scripts, monitoring pods and nodes in every GKE cluster, monitor cpu and ram from Prometheus and apply algorithms with typescript for traffic split between GKE clusters. As service mesh used Google Anthos (in progress).

SKILLS & KNOWLEDGE

Containerization & Service Mesh: Docker, Kubernetes, Amazon Elastic Beanstalk, Amazon Elastic Container Service, Istio Service Mesh, Anthos Service Mesh
Cloud Providers: AWS, Google Cloud Platform, Microsoft Azure
CI/CD & Infrastructure Provisioning: Jenkins, GitHub Actions, GitLab CI, Terraform, Amazon CDK, Helm Charts, ArgoCD
Monitoring and Logging: Grafana, Prometheus, Amazon CloudWatch, Loki, Netdata
Security & Code Quality: SonarQube, Dependency Track, OWASP Zap
Publish-Subscribe Systems: Apache Kafka, RabbitMQ, Orion, Scorpio, Stellio
Databases: MySQL, PostgreSQL, MongoDB, Amazon Timestream
Programming Languages, Libraries & Web Frameworks: Bash**,** JavaScript, Python, TypeScript, PHP, Java, Node.js, React.js, Next.js, HTML5, CSS
CMS: Typo3

ADDITIONAL INFORMATION

Languages: GREEK: Native || ENGLISH: Proficient (C2) || FRENCH (B1)
Military Services: Sept 2021 – Sept 2022
